

What is possible when learning from horses?

*Any group who desires empowerment through a unique and memorable experience can benefit from **Equine Assisted Teambuilding and Leadership Training**.*

Every Learning experience is custom designed for your unique organization with your own common language and areas of concern.

It is easier when a horse tells you: even though several people tell us about our possible opportunity areas (areas of improvement), generally when we see things in a third party, it's when the impact is greater. Now, if this third party is a horse and it shows things to me in such a clear way, the impact will be much greater than the repetitive remarks of other people.

Team Building:

- Establish or question the rules/guidelines of your personal team: Change the rules in the moment if they are no longer work.
 - Identification of your team's strategies: Break out of old patterns in the moment. Find self-imposed limitations.
 - Locate the resistance in your team: Generate a dialogue and actions that are empowering.
 - Create energy and passion that inspire and motivate team members.
 - Discover natural and new strengths present in your team members.
 - Interact in an atmosphere that is unfamiliar to your team where all things become possible.
- Leadership Training: Horses have a unique ability to mirror humans through spoken language; body language and the language of emotion getting to the heart of where leadership begins and is cultivated. This training is done individually or in small groups.
