

What's Possible using Horses for Team Building?

Any group who desires empowerment through a unique and memorable experience can benefit from an Equine Assisted Teambuilding or Leadership Training.

Every Equine Assisted Learning (EAL) experience is custom designed for your unique organization with your own common language and areas of concern.

Team Building:

- Establish or question the rules/guidelines of your personal team: Change the rules in the moment if they are no longer work.
- Identification of your team's strategies: Break out of old patterns in the moment. Find self-imposed limitations.
- Locate the resistance in your team: Generate a dialogue and actions that are empowering.
- Create energy and passion that inspire and motivate team members.
- Discover natural and new strengths present in your team members.
- Interact in an atmosphere that is unfamiliar to your team where all things become possible.

Leadership Training: Horses have a unique ability to mirror humans through spoken language; body language and the language of emotion getting to the heart of where leadership begins and is cultivated. This training is done individually or in small groups.
