Who is who?

What strength does each individual bring? Who naturally leads who naturally supports? These talents quickly reveal themselves!

Why Horses?

Horses are prey animals. Their genetic makeup (DNA) requires them to read the *intention* of the predator. Their gregarious nature, connects them with others. They live in the present moment, not fretting about the past or the future. They are non-judgmental. Their language is unspoken and it crosses all barriers of culture; race; age; gender; language; socio economics and education.

It's hard to ignore a 1200 pound horse!

Who needs team building?

Let's face it, life is a group activity!

Corporations, Doctors, Nurses, Government Agencies, School teachers and administrators, Office workers, Sport teams .

Any group who desires empowerment through a unique and memorable experience.

WHAT'S POSSIBLE?

Establish the rules/guidelines for your team:
Change the rules in the moment if they are no longer work.

Immediate results in one session.

Creative problem solving that is retained!

Learn by doing—Find self-imposed limitations.

Locate the resistance in your team: Get to the heart of the matter. Emotional Intelligence.

Create energy and passion that inspire and motivate your team members.

Develop Dr./ Patient relationships in your health care practice.

Interact in an atmosphere that is unfamiliar to your team where all things become possible.
